

Evidence of Practice in Action

On highly functioning learning teams, data—instead of personal preferences—are used to evaluate the impact of every instructional practice. Use this worksheet to track the impact that the key practices embraced by your learning team are having on student achievement.

Key Instructional Practice <i>Write a short description of each of the key instructional practices that are implemented in the classrooms of your learning team.</i>	Evidence of Impact <i>Describe the steps that you have taken to document the effectiveness of each key instructional practice and the conclusions you have drawn from team data sets.</i>	Next Steps <i>Indicate the action your team plans to take based on your findings.</i>
<p><i>Example:</i> Our team has students annotate selections of text while reading, hoping that by slowing the reading process down, student comprehension will increase.</p>	<p>On the last two reading comprehension quizzes, students were required to annotate before answering any questions. The average score on these assessments increased by 4 points.</p>	<ul style="list-style-type: none"> <input type="checkbox"/> Practice has proven to be successful and should be replicated. <input type="checkbox"/> Practice needs continued study because the data collected point to inconsistent conclusions. <input type="checkbox"/> Practice has no impact on student growth and should be eliminated.
		<ul style="list-style-type: none"> <input type="checkbox"/> Practice has proven to be successful and should be replicated. <input type="checkbox"/> Practice needs continued study because the data collected point to inconsistent conclusions. <input type="checkbox"/> Practice has no impact on student growth and should be eliminated.
