

**Figure 2.12: Project Summary and Reflection Form**

<b>Names:</b>
Engineering design challenge:
<b>Design Space</b>
Describe the end user.
List the three most significant constraints that impacted your design.
List the three most significant criteria that impacted your design.
<b>Developing Your Prototype</b>
List some of the options you considered.
List three reasons you chose your prototype.
Discuss some of the challenges you encountered when creating your prototype.
Say whether you needed to modify your prototype. If you did, explain why and how you modified it.
<b>Final Thoughts</b>
Say whether you think your prototype provides a good solution and why.
Describe what you learned from following the engineering design process to develop your prototype.
Describe what you have learned about yourself while doing this project.
