

## LEGO Person Activity—Directions

These are the directions for the LEGO person activity.

1. Your group appoints an observer.
2. When I say “Go,” all observers will go to the LEGO person. They will have one minute to observe him. No one can touch him. Hands have to stay behind your backs.
3. Observers can only return to their tables when I call “Stop.”

***Observers must stand by their tables with their hands behind their backs!***

When I say “Go,” the observers have two minutes to tell their group how to build the LEGO person.

4. At the end of two minutes, you must choose a new observer. When I say “Go,” the new observers will go to the LEGO person to observe for one minute.

***No one can build while the second observer is gone!***

5. When I say “Stop,” the second observers will return to their groups—with their hands behind their backs.
6. When I say “Go,” the observers have two minutes to tell their group how to build the LEGO person. The first observer can help build.
7. We will repeat this two or three more times, with a new observer every time.
