

## Planning Technology-Integrated Learning: Self-Assessment

	Strongly Disagree	Disagree	Agree	Strongly Agree
I selected technology that serves the lesson's specific educational goals.				
I clearly identified what students will learn as a result of technology integration.				
I prepared quality materials required by the activities.				
Students know what is expected of them and how they should demonstrate what they have learned.				
I selected technology that increases student motivation to learn and engagement with learning.				
I selected technology that creates authentic opportunities for collaboration and interaction.				
I selected technology that supports the development of communication skills (such as writing or oral presentation).				
I selected technology that supports the development of higher-order thinking such as critical-thinking and problem-solving skills.				
I selected technology that promotes creativity and ingenuity.				
I selected technology that helps move the learning environment from teacher dominated to student centered.				
I selected technology that allows for better differentiation and more student choice.				
I selected technology that provides multisensory stimuli, such as images and sounds, to enrich learning.
