

## Chapter 6 Reflection Questions

Now that you have completed the chapter, consider and reflect on the following questions.

1. What are the three most important pieces of data that you use to understand your students? Is there more information that would be useful to you? If so, what are some easy-to-implement tools to obtain it?
2. What is the current culture and climate at your school around openly sharing data? Would you like to encourage more data sharing? What steps could you take to help your school move in that direction?
3. What other analogies have you heard or used to describe data?
4. What digital resources and tools give you access to student and learning data? How can you use these data to benefit students' learning?
