

Exercise: Enter Unit Standards Onto the PREP Template

To prepare for the six-step PREP, write the entire set of standards for a targeted unit your team is planning to teach. As teams read about each step throughout this chapter, they may stop to participate in exercises and return to the PREP template to record more information. Alternatively, teams can read the entire chapter and work on all exercises in a fluid fashion.

Use the following questions to guide this exercise.

- What unit will our team work on together to practice the PREP process? When will we teach this unit?

- How can we work as a collaborative team to identify standards for this first step in the PREP process?

- What plan can we put in place to address logistical decisions such as, When and where will we meet? Who will facilitate the meeting? Who will access the template and perhaps convert it to a Google Doc to share with others? Who will enter the information onto the template?

- If I am in a situation where I do not have a collaborative team in my building or district (I am a singleton teacher), who can I reach out to from another school or district?
