

Exercise: Indicate (or Determine) Priority Standards

Review the standards you put in the PREP template. If your team has already prioritized standards, distinguish these priority standards from supporting ones by bolding, underlining, or color-coding them. If you haven't yet prioritized, do so following the steps given in this section and then mark them in the template.

Use the following questions to guide this exercise.

- Which standards are most essential to a student's academic and lifelong success?

- Which of our standards meet the criteria for endurance, leverage, and readiness?

- Are there supporting standards that will become priority standards in a unit later in the school year?
